

Explorer for Fire Suppression Products

Features and benefits

- One-stop-shop for fire suppression parts information
- Easy search provides:
 - Technical data sheets
 - Revit families
 - Specification details

Welcome to our online parts database

The Explorer online parts database for fire suppression products is your destination to access product information for TYCO® sprinklers and valves, GRINNELL G-Fire couplings and fittings, and so much more. This site includes thirteen different major parts categories that can be navigated in a variety of ways returning a number of resources. Self-guide browsing is an option in addition to the easy-to-use search field.

Each part in the database gives access to specification details, CAD/BIM files and technical data sheets - just a few of the resources you'll find here. Whether you are a designer, a fire protection engineer or an Authority Having Jurisdiction (AHJ), you will find the details you need on the Explorer site to get your job done.

Visit the Explorer database site for more information:
